

Make a Journal

One of the reasons that we know about how people lived in the past is because journal writing was a popular pastime. Now, you can make your own journal and write about your daily life so people in the future can read about today!

- Step 1: Find the following items from your camp kit:
 - Colored piece of scrap paper (folded in half) = journal cover
 - Ten sheets of white paper already folded with two holes punched = inside paper for journal
 - Two pieces of ribbon
 - Pencil
- Step 2: Place the packet of white paper inside the journal cover so the holes line up.
- Step 3: Thread one piece of ribbon through one hole and tie a knot or bow (make sure it goes through all the pieces of paper and the cover).
- Step 4: Repeat with the other ribbon in the other hole.
- Step 5: Begin writing on the first page about anything you want. Be sure to put the date each time you write!
