

# Balloon Car Experiment

## Objective

Build a car powered by a balloon.

## Materials

- 3 paper straws
- 1 milkshake straw
- 6 foam discs
- 2 balloons
- 1 balloon nozzle

## Instructions

1. Take the materials for this activity from your kit
2. Determine which materials you want to use to build you balloon car
3. Assemble your car. Feel free to use other items you have at home.
4. Test your car out on a flat surface.
5. Observe how your car traveled and make any changes to it that you think might improve its performance.
6. Finalize your car.
