

Make Your Own Hummingbird Feeder

Materials

- Red plastic cup
- String
- Scissors
- Markers

Instructions

1. Using your marker, draw two half moon shapes on either side of the cup. They should be about two inches from the bottom.
2. Use your scissors to cut them out.
3. Then, mark two small dots on either side of the cup. They should be right below the rim of the cup.
4. Use the scissors to poke out holes where you've marked the dots.
5. Cut a piece of string.
6. Run the string through the two holes and then tie the two ends together.
7. Fill your feeder with hummingbird food (see recipe on next page) and hang it outside.

Hummingbird Food Recipe

Ingredients

- ¼ cup of white granulated cane sugar
- 1 cup of water

Procedure

1. Place 1 cup of water in a measuring cup.
2. Add ¼ cup of sugar and stir until dissolved.
3. If desired, heat the mixture in the microwave on high for two minutes, although it's not necessary.
4. Stir again.
5. Allow to cool.
